*Proposed Allowed Claim Amounts are amounts invested less the amount received back by an investor. Where an investor's claim was objected to, the proposed allowed claim amounts would be the amount recommended by the Receiver in the claim objection unless there was a timely written response. Where there was a timely written response, the allowed claim amount represents the amount agreed to between the Receiver and the investor.

**The Proposed Distribution Amount was arrived at by taking the Proposed Distribution Percentage of 6.6853% and applying it to the allowed amount of each investor's claim. The distribution percentage was calculated by taking the \$1,000,000 distribution amount and dividing it by the total proposed allowed amount of all claims -- \$14,958,238.
